

# Save the Date

Remember to **Save the Date** and join renowned MH experts, expand your knowledge about MH, and ask questions!

**WHAT: MH Mini-Conference for medical professionals and patients**

**WHEN: September 11, 2010**

**WHERE: Toronto MH Investigation Unit  
Toronto General Hospital  
200 Elizabeth Street (Elizabeth and College)  
Room: EN-1-429/430  
(First floor, Eaton Wing, beside the library)**

You will see presentations by two MH experts who also are volunteers on the MH Hotline will discuss the various clinical aspects of MH in order to assist medical professionals to recognize it quickly and treat it appropriately. Additionally, specific insights will be shared regarding what is MH and how does it affect the patient with medically-oriented attendees, but is also appropriate for those who are MH-susceptible and their family members and/or caregivers. The genetics of MH will also be addressed.

Ample time will be given in each speaker's session to allow for questions and to share attendees' experiences within the entire assembly. If time allows, we will also go through an MH Mock Drill scenario and discuss how to organize an MH Mock Drill, how events are handled and the groups' response evaluated as to speed, accuracy and "whether the patient lived".

Demonstrations of how to mix up the antidote for MH, Dantrium ® IV, will be held, with the opportunity for some of the medical professionals to get actual, hands-on experience.

## **DON'T MISS THIS OPPORTUNITY TO LEARN ABOUT MH**
